

SERRES

Suction
solutions
for your
goals

Your professional choice

How do you prepare for situations that leave no room for compromise? How do you get ready for an operation if you are pressed for time? How can you get it right from the beginning?

Serres Suction system covers the broadest range of medical suction applications and it can be supplemented at anytime to meet your changing needs. Our products are easy to use and manufactured to the highest quality standards.

Today our Suction system is used in more than 35 countries. You can trust our easy-to-use products even in the most demanding procedures.

SERRES

Designed to
work as a team

SERRES

By selecting the right partner hospitals can ensure all necessary purchases come from one source with the clear benefit of local support, high quality, on-time delivery and a competitive pricing.

Global best practices through local expertise

Serres is dedicated to high quality both in terms of product development and customer service. We have carefully selected and trained our distribution partners for your local market. When it comes to liquid handling in a hospital environment, together with our local partner we make sure you have the best possible solution.

Unique product range

The Serres Suction system is a unique concept. The system can easily be adapted and used in many different clinical applications: operating rooms, intensive care units, hospital wards and ambulances. We are confident that from our wide range of speciality bags and accessories you'll find the right solution for your specific need. All Serres components are compatible with other Serres products and optimised to function together.

The best value-for-money

The biggest savings do not always come from the lowest purchase price. What is the real cost if your OR is not up and running or staff kept waiting for the necessary systems and equipment?

High quality, wide product selection, ease of use and secured functionality ensure that you always have a suction system at hand, with no surprises in terms of costs.

Manage your stock effectively

Serres products are exceptionally light and compact, taking up three times less space than any alternative product in the market. The standardization of our product range enables you to manage and control your stock more efficiently: fewer reference orders, smaller inventories, improved patient care.

Reduce your waste handling costs

The unique features of the Serres system ensure reduced running and disposal costs for the hospital. With Serres Pre-gelled bag, there is no more accidental spillage of liquid and contact with potentially infectious waste - a feature that is highly appreciated by nursing and cleaning staff.

With our comprehensive and cost-efficient liquid waste management system, you need only one supplier. Select Serres and you can work with ease.

SERRES

When compromise
is unacceptable

In a hospital environment two factors have a major influence on patient outcome: operational safety and hygiene. The easy-to-use products from Serres ensure that healthcare staff can focus on the job at hand. The innovative design of the system ensures that hygiene requirements are never compromised.

The simplest connection

The intuitive design together with the market's simplest Single Connection™ ensure error free installation of Serres Suction system. Thanks to highly resistant materials, reliable plugs and a strong lifting handle the disposal of Serres Suction bags is convenient and safe; no leakage, no spillage. All accessories are fully compatible, making the system ergonomic and fast to use. The Suction canisters robust build and resistant materials allow for effective cleaning.

Serres Pre-gelled bags enable easy and safe handling of liquids. With minimal risk of accidental spillage of liquid and contact with potentially infectious waste, nursing and cleaning staff can focus on patient care and hygiene.

High-efficiency and reliability of hydrophobic filter

All Serres Suction bags are equipped with a hydrophobic filter that will act as a reliable overflow valve and an efficient barrier to dissemination of bacteria. This filter will definitely protect your vacuum source, also stopping foam and blood splashes, as its activation does not depend on alignment of mechanical parts.

SERRES

The smoothest path to better care

The complete portfolio of suction solutions from Serres will ensure practical and functional suction for the entire hospital and peace of mind for all parties involved.

Improve your operational efficiency

Serres Suction bags and accessories adapt to all your clinical suction needs. Versatile and fully compatible products improve your operational efficiency and make stock control easier.

Quick start brings more efficiency

Top usability and the patented Single Connection™ enable you to set up the system rapidly and begin an operation without delay. Intuitive design and no risk of misconnection make the system easy to learn and fastest to teach also to new healthcare staff.

Largest capacity for the entire operation

With the serial connection system, the suction capacity can be expanded up to 36 litres. Thanks to the smart and compact set-up, you can perform the entire surgery without user intervention.

Optimal usability and ergonomics

Serres Suction system is known for its superior user friendliness and enhanced ergonomics. Serres products have been designed with the convenience of nursing staff in mind and optimally fit in all hospital environments. Canisters can be placed on our stable trolleys at an easy-to-reach height without extra bending. Our oval shaped 1000 ml canisters take up minimal space and are perfect for ICUs, anaesthesia work stations and ambulances.

SERRES

World leading suction system provider

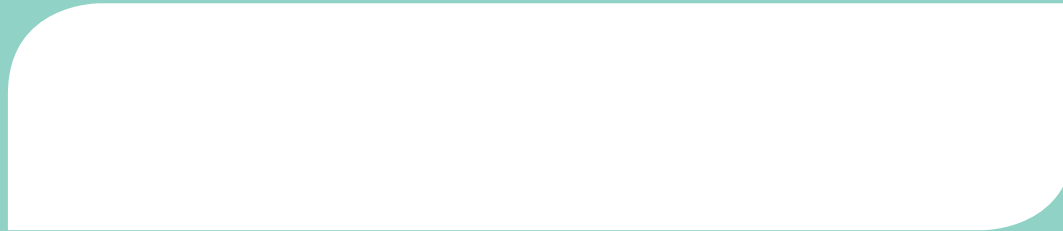

Serres provides high-quality suction systems for healthcare professionals

We are known for our high-quality products and innovative solutions. Thanks to our continued commitment to product development, we are proud to offer one of the most advanced suction systems in the world.

Serres is a family-owned Finnish company. We are the largest supplier of suction systems in Europe and the second largest globally.

Our mission is to help healthcare professionals succeed in their daily work. We build trust into our equipment, so patients can trust you to provide the best possible care.
